## WOUND CARE

### Creating optimal conditions for healing

When every person and wound is unique, the treatment plan for wound care should be too. Finding the right combination of products is essential for providing wound care treatment. Curi-Med is a line of wound care products developed by, and for, professionals, used primarily in home care, clinics and hospitals.

All products are characterized by high quality and functionality at competitive prices, and created in cooperation with in-house nurses, working directly with manufacturers, hospitals, and organizations, in order to bring you the most up-to-date knowledge and products.

Developed by health care professionals

Find solutions for wound healing in our comprehensive range of conventional wound care products, where hygiene, safety and comfort are key.

- A complete product range for the treatment of acute/post-operative wounds, circulatory disturbances, support and retention.
- For sterile and non-sterile procedures.
- Design and packaging developed for hygienic and easy handling to minimize risk of infection.
- CE marked in accordance with the EU Medical Devices Directive and manufactured in accordance with ISO 13485.
- All Curi-Med products are CE certified in accordance with EU directive 93/42/EEC.

Curi-Med sterile Absorbent Bandages combine a soft contact surface with high absorption capacity for absorption of wound fluids in a sterile environment. Must be fixed, cannot be cut in.

## Dressings

### Post-OP dressing, Abena Curi-Med

Item number	Ingredients / Composition	Dimensions	Layer quantity	Color	Pcs per pk / pk per cl
221430	Polypropylene, polyester, acrylic adhesive	6x7cm	4-layer	White	100 / 16
221431	Polypropylene, polyester, acrylic adhesive	8x10cm	4-layer	White	70 / 16
221432	Polypropylene, polyester, acrylic adhesive	10x15cm	4-layer	White	40 / 16
221433	Polypropylene, polyester, acrylic adhesive	10x20cm	4-layer	White	40 / 16
221434	Polypropylene, polyester, acrylic adhesive	10x25cm	4-layer	White	40 / 16

Curi-Med Post-OP dressing is made with a soft nonwoven backing with a skin-friendly acrylate adhesive. The soft polyester wound pad is absorbent and does not adhere to the wound. The bandage is soft and shapes itself according to the body's contours. The nonwoven backing allows the skin to breathe through the dressing. Used as a primary dressing for dry to slightly exuding wounds, such as cuts, scrapes and scab protection over sutured wounds.

## Post-OP dressing, waterproof, Abena Curi-Med

Item number	Ingredients / Composition	Dimensions	Features	Color	Pcs per pk / pk per cll
221436	Polypropylene, polyurethane, polyester, acrylic adhesive	6x7cm	Semiper-meable, bacterial and virus-proof, liquid-proof, sterile	White	100 / 16
221437	Polypropylene, polyurethane, polyester, acrylic adhesive	8x10cm	Semiper-meable, bacterial and virus-proof, liquid-proof, sterile	White	70 / 16
221438	Polypropylene, polyurethane, polyester, acrylic adhesive	10x15cm	Semiper-meable, bacterial and virus-proof, liquid-proof, sterile	White	40 / 16
221439	Polypropylene, polyurethane, polyester, acrylic adhesive	10x20cm	Semiper-meable, bacterial and virus-proof, liquid-proof, sterile	White	40 / 16
221440	Polypropylene, polyurethane, polyester, acrylic adhesive	10x25cm	Semiper-meable, bacterial and virus-proof, liquid-proof, sterile	White	40 / 16
221441	Polypropylene, polyurethane, polyester, acrylic adhesive	10x30cm	Semiper-meable, bacterial and virus-proof, liquid-proof, sterile	White	40 / 8
221467	Polypropylene, polyurethane, polyester, acrylic adhesive	10x35cm	Semiper-meable, bacterial and virus-proof, liquid-proof, sterile	White	40 / 8

Curi-Med waterproof Post-OP dressing is a soft and comfortable sterile dressing for wounds with low secretion as well as for sutured wounds. The upper layer is made of nonwoven material with a semi-permeable polyurethane film. The upper layer causes fluid from the wound to evaporate thereby reducing the risk of maceration during wound dressing. The wound pad absorbs any excess fluid and prevents the bandage from sticking. The adhesive is skin-friendly and leaves no adhesive residues. The bandage is bacterial and virus-proof and is also showerproof. Used as a primary dressing for dry to slightly exuding wounds, such as cuts, scrapes and scab protection over sutured wounds.

## Secure fixation

- The most hygienic and reliable way to fix dressings and probes.
- The range consists of tapes, film dressings and different type of bandages including tubular bandages

## Fixation

## Transparent tape, Abena Curi-Med

Item number	Ingredients / Composition	Dimensions	Features	Sub-color	Roll per pk / pk per cll
210877	PE, acrylate adhesive	9,14m x 1,25cm	Non-sterile	Transparent	24 / 20
210878	PE, acrylate adhesive	9,14m x 2,5cm	Non-sterile	Transparent	12 / 20
210879	PE, acrylate adhesive	9,14m x 5cm	Non-sterile	Transparent	6 / 20

Curi-Med Transparent surgical tape is a perforated, lightweight, elastic tape made of polyethylene with a hypoallergenic adhesive. Is semipermeable, allowing the skin to breathe. Can be used during x-rays and is latex-free. Can be easily torn lengthways and across without the need for scissors.

## Microporous tape, Abena Curi-Med

Item number	Ingredients / Composition	Dimensions	Features	Color	Roll per pk / pk per cll
210880	Rayon, viscose, acrylate adhesive	9,14m x 1,25cm	Non-steriel	White	24 / 20
210881	Rayon, viscose, acrylate adhesive	9,14m x 2,5cm	Non-sterile	White	12 / 20
210882	Rayon, viscose, acrylate adhesive	9,14m x 5cm	Non-sterile	White	6 / 20

Curi-Med Microporous tape is made of viscose/rayon with a hypoallergenic adhesive. Allows the skin to breathe. Can be used during X-rays and is latex-free. Can be easily torn without the need for scissors.

## Silk tape, Abena Curi-Med

Item number	Ingredients / Composition	Dimensions	Features	Color	Roll per pk / pk per cll
210883	Rayon acetate, zinc oxide, natural rubber	9,14m x 1,3cm	Non-sterile	White	24 / 20
210884	Rayon acetate, zinc oxide, natural rubber	9,14m x 2,5cm	Non-sterile	White	12 / 20
210885	Rayon acetate, zinc oxide, natural rubber	9,14m x 5cm	Non-sterile	White	6 / 20

Curi-Med silk tape is made of rayon acetate with a strong adhesive of zinc oxide and natural rubber. Is inelastic and provides a secure fix. Can be torn lengthways without the use of scissors. Can be used during x-rays. Contains latex.

## Fixation

### Cotton tape, Abena Curi-Med

**CURI-MED** ABENA

Item number	Ingredients / Composition	Dimensions	Features	Color	Roll per pk / pk per cll
210886	Cotton, zinc oxide, natural rubber	9,14m x 1,25cm	Non-sterile	Brown	24 / 20
210887	Cotton, zinc oxide, natural rubber	9,14m x 2,5cm	Non-sterile	Brown	12 / 20
210888	Cotton, zinc oxide, natural rubber	9,14m x 5cm	Non-sterile	Brown	6 / 20

Curi-Med Canvas tape is made of cotton with a strong adhesive of zinc oxide and natural rubber. Is inelastic and provides a secure fix. Must be cut to the desired length. Can be used during x-rays. Contains latex.

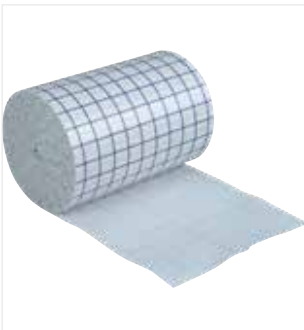

### Fixation tape, Abena Curi-Med

**CURI-MED** ABENA

Item number	Ingredients / Composition	Dimensions	Features	Color	
220955	Polyester non-woven, acrylate adhesive	10m x 2,5cm	Elastic, Non-sterile	White	2 / 72 pcs per pk / pk per cll
220956	Polyester non-woven, acrylate adhesive	10m x 5cm	Elastic, Non-sterile	White	1 / 72 pcs per pk / pk per cll
220957	Polyester non-woven, acrylate adhesive	10m x 10cm	Elastic, Non-sterile	White	1 / 36 pcs per pk / pk per cll
220958	Polyester non-woven, acrylate adhesive	10m x 15cm	Elastic, Non-sterile	White	1 / 18 pcs per pk / pk per cll
1000007331	Polyester non-woven, acrylate adhesive	10m x 20cm	Elastic, Non-sterile	White	1 / 12 roll per pk / pk per cll

Curi-Med fixation tape is flexible and shapes itself to the body's contours. Is permeable to air and moisture, which prevents maceration. Skin-friendly adhesive, which also provides a secure fix at the same time. Is fitted with a wavy, perforated backing, which facilitates handling. Can be cut into suitable lengths. Used for fixation of bandages, catheters, tubes, etc.

## Film dressing, Abena Curi-Med

Item number	Ingredients / Composition	Dimensions	Features	Color	Pcs per pk / pk per cll
220947	PUR, acrylate adhesive	10m x 5cm	Non-sterile	Clear	1 / 72
220948	PUR, acrylate adhesive	10m x 10cm	Non-sterile	Clear	1 / 36
220949	PUR, acrylate adhesive	10m x 15cm	Non-sterile	Clear	1 / 36

Curi-Med transparent film dressing in a roll is a soft, comfortable, and thin semipermeable polyurethane film. The film dressing is bacterial and virus-proof. Is also fluid-proof. Evaporation capacity reduces the risk of maceration of the skin under the film. The adhesive is skin-friendly and leaves no adhesive residues.

## Film dressing with frame, Abena Curi-Med

Item number	Ingredients / Composition	Dimensions	Features	Sub-color	Pcs per pk / pk per cll
220961	PUR, acrylate adhesive, polyester, PE	4,5x4,5cm	Sterile	Transparent	200 / 16
220962	PUR, acrylate adhesive, polyester, PE	7x6cm	Sterile	Transparent	100 / 16
220963	PUR, acrylate adhesive, polyester, PE	12x10cm	Sterile	Transparent	100 / 16
220964	PUR, acrylate adhesive, polyester, PE	25x10cm	Sterile	Transparent	75 / 16
220965	PUR, acrylate adhesive, polyester, PE	20x15cm	Sterile	Transparent	50 / 16

Curi-Med film dressing with frame is a soft and comfortable thin sterile semipermeable polyurethane film. The film dressing is bacterial and virus-proof. Is liquid-proof. Evaporation capacity reduces the risk of maceration of the skin under the film. The adhesive is skin-friendly and leaves no adhesive residues. Frame system makes application simple. Used for affixing primary dressings, it is used as a protective bandage and for securing IV catheters.

## Fixation

### Film dressing, Abena Curi-Med

Item number	Ingredients / Composition	Dimensions	Features	Color	Pcs per pk / pk per cll
220919	PUR, polyester, acrylate adhesive	30x10cm	Semiper-meable, bacterial and virus-proof, liquid-proof, sterile	White	40 / 8
220932	PUR, polyester, acrylate adhesive	7x6cm	Semiper-meable, bacterial and virus-proof, liquid-proof, sterile	White	100 / 16
220933	PUR, polyester, acrylate adhesive	10x8cm	Semiper-meable, bacterial and virus-proof, liquid-proof, sterile	White	70 / 16
220934	PUR, polyester, acrylate adhesive	15x10cm	Semiper-meable, bacterial and virus-proof, liquid-proof, sterile	White	40 / 8
220935	PUR, polyester, acrylate adhesive	20x10cm	Semiper-meable, bacterial and virus-proof, liquid-proof, sterile	White	40 / 8
220936	PUR, polyester, acrylate adhesive	25x10cm	Semiper-meable, bacterial and virus-proof, liquid-proof, sterile	White	40 / 8

Curi-Med Film dressing with wound pad is a soft and comfortable thin sterile semipermeable polyurethane film for wounds with low secretion. The film layer causes fluid from the wound to evaporate therefore reducing the risk of maceration during wound dressing. The bandage is bacterial and virus-proof and is also showerproof. The wound pad absorbs any fluid and prevents the bandage from sticking. The adhesive is skin-friendly and leaves no adhesive residues.

### IV fixing, Abena Curi-Med

Item number	Ingredients / Composition	Dimensions	Features	Color	Pcs per pk / pk per cll
221435	Acrylate, non-woven, polyester	8x6cm	Nonwoven with pad	White	100 / 16

Curi-Med IV dressing is a soft and comfortable dressing. The upper layer is a soft and comfortable nonwoven material. The soft pad on the bandage absorbs excess fluid from the puncture site and prevents the bandage from adhering to the needle. The adhesive is very skin-friendly and does not leave any residue. The bandage is provided with a slit and is easy to apply. Latex free, individually packed and sterile.

Curi-Med fixation binding with self-adhesive feature is a soft, crepe fixation band made of cotton, viscose, and polyamide coated with a thin layer of latex. This layer ensures the binding is self-adhesive—does not stick to bandages, skin or hair. Used for fixation of various bandages, as well as fixation of tubes, needles, and catheters.
