PRODUCT OVERVIEW

HidraWear is the world's first and only self retaining wearable wound dressing system, intended for home use by people with wounds in difficult to dress areas of the body.

Comprising of a proprietary wound dressing and retention aid (garment), HidraWear **replaces traditional wound dressings** and represents an ideal solution for patients living with wounds that are difficult to dress.

HidraWear is intended for home use by people with wounds in the **axillary, buttocks and groin regions** that require routine wound management, and empowers patients to self-manage their wound care more effectively and with greater independence in the home setting.

HidraWear removes the need for the dressings to be adhesively attached to the skin in order to hold the dressing in position. As well as facilitating quick and easy dressing changes, **enabling patients to self-manage wound care-more effectively**. It consists of 3 parts as shown;

Superabsorbent Wound Dressings with a **unique External Fastening Tab**, co-packed with every dressing.

Body conforming under-garment. The garment provides provisional retention of the dressing, with the external fastener facilitating a secure, quick and easy wound dressing, without the use of tapes or adhesives.

HidraWear garments are made from a micromodal material, a naturally derived fabric that is **light, highly breathable, moisture wicking, durable and most importantly, super soft**. It's a perfect fabric for use on delicate skin.

The garments incorporate a **Targeted Dressing Retention Area**, such as the Axillary Region, Buttocks Groin and Upper Thigh. The perforations in these are used by the external fastener to fix to the backing of the dressing. This ensures secure and adhesive free retention of the dressing on the wound.

Application Oh So Easy...

HOW HIDRAWEAR WORKS

The garment facilitates easy insertion, removal, precise positioning, and adjustment of HydraWear dressings onto the affected wound space. A perforated section is located over the affected area e.g. the axilla. The dressing is placed inside the garment, under the perforations. **The back of the dressing has a proprietary surface, unique to HydraWear dressings that allows the co-packed fastener to attach to it through the perforations.** The fastener is then placed on the outside of the garment on the footprint of the dressing. The dressing is secured in place through a hook and loop mechanism.

	STEP 1 Put on the HydraWear Garment	STEP 2 Insert the HydraWear Dressing Place over the wound area	STEP 3 Secure the HydraWear Dressing in place with the External Fastening Tab
HydraWear^{AX} Crop Top Axillary Region			
HydraWear^{BB} Boxer Briefs Buttocks & Groin			

THE DRESSING

Designed specifically for difficult to dress areas of the body such as the axilla, buttocks, groin & upper thigh. The soft, superabsorbent dressing can retain large amounts of wound exudate.

Available in 2 sizes:

- 3" x 5" (30 Pack & 60 Pack)
- 5½" x 7½" (10 Pack)

Each dressing is individually sterile packed and co-packed with a fastener

Ideal for HS Wounds Affected Areas:

Key Features of Dressing

- 1** HydraHex **Hook & Loop retention** technology secures dressing in place without use of any adhesives.
- 2** **Anthropologically mapped crimp lines** that conforms & moves with the body.
- 3** **Highly absorbent** to manage large and sudden volumes of exudate.
- 4** Uses **superabsorbent technology** to lock exudate and potentially harmful bacteria away from the wound, so the dressing remains dry to the touch.
- 5** **Heat Sealed Border** reduces exudate leakage from the dressing, so that the patient remains clean and comfortable
- 6** **Protective layer.** The fluid-repellent backing prevents external contamination of the wound and protects clothes and bed linen from exudate strike-thru.

THE GARMENTS

HidraWear are reusable garments which act as a dressing retention aid.

The garments incorporate targeted dressing retention areas, which enables the fastening element of the dressing to engage to the backing of the dressing through the garment, thereby assuring exact placement and retention of the dressing.

Key Features

HidraHex

The underarm hexagon channels are designed to minimise leaks and strike through whilst remaining fully breathable.

SeamSense

HidraWear garments have outward facing seams. This ensures soft fabric is against delicate and sensitive skin to reduce irritation.

Easy On

HidraWear AX Crop Top is front closing making it easy to put on and remove.

AeroSilk

All HidraWear garments are made of a premium micro-modal and elastane blend fabric that is soft, breathable, and moisture wicking to keep skin dry.

TrueFit

With adjustable straps, you can tailor HidraWear for a bespoke fit. (AX Crop Top only)

Women's Crop Top

HidraWear Crop Top for Women is light, breathable and body conforming for maximum comfort. Ensuring the axilla dressings will stay in place. Your patients can now worry less about managing their wounds and get back to living their best lives.

Unisex T-Shirt

HidraWear Unisex T-shirt is light, breathable and uses SeamSense outward facing seams for maximum comfort. Ensuring the axilla dressings will stay in place, giving the patient more confidence in managing their wounds.

Women's Briefs

Secure dressing retention in the buttocks and groin. A special opening in the crotch to allow a quick bathroom stop without removing garment and losing your dressings. Empowers HS patients to self-manage their wound care more effectively in the home setting.

Men's Boxer Briefs

Secure dressing retention in the buttocks and groin. Empowers patients to self-manage their wound care more effectively in the home setting.

Available in 5x sizes S – XXL in all Garments.

CLINICAL BENCHMARKING

HidraMed Solutions has completed robust benchmarking of HidraWear technology against existing state of the art wound dressing technologies, together with two independent tissue viability nursing groups.

Findings show that HidraWear offers significant advantages in terms of **clinical efficacy, simplicity, comfort, control, and style.**

Further, both nursing groups stated that the simplicity of dressing changes and retention offered by HidraWear technology is conducive to health system savings due to the **increased capacity of patients to self-care**, reducing out-patient and community care services.

STEP 1

Put on the Garment

STEP 2

Apply the dressing

STEP 3

Use **co-packed fastener** to secure the dressing in place

Dermatology nurses found HidraWear innovative, and saw a host of advantages:

1

Effective

A clear solution for holding dressings in place.

2

Simple

Quick and easy for patients to change dressings.

3

Comfortable

Soft, pliable, lightweight, and breathable making it easy to wear.

4

Clever

A unique solution - would feel great about recommending.

5

Clothing

Non medical, a real and everyday solution to make patients feel normal.

6

Stylish

Looks like activewear, cool, bra/crop top make patients feel positive.

7

Bespoke

A solution designed specifically for HS & difficult to dress areas makes patients feel special / cared for.

8

Control

An approach that is designed to put patients back in control of their lives.

HidraWear Design Features

- ✓ Adhesive Free Skin Contact
- ✓ No Tape or Bandages
- ✓ Secure Dressing Retention
- ✓ Superabsorbent
- ✓ Cushioned/Body Conforming
- ✓ Kind to sensitive skin
- ✓ Easy to Apply, Adjust and Remove

PATIENT TESTIMONIALS

"I've been using HydraWear since it was initially launched in Ireland and the products are amazing! Before I was using adhesive dressings which caused severe redness to my skin which was both painful and itchy. **HydraWear has enabled my skin to completely calm down and to heal more than it has in years.** I was worried about odour after bad experiences with other dressings but I haven't had any issues with odour using HydraWear. The garment is very comfortable also. It has given back a sense of independence around my wound care that I haven't had for years. Well done to all involved in creating such an amazing product! "

Aimee C, Ireland

"I'm a sufferer of HS for over 30+ years and the HydraWear was a revelation to me. The whole product is easy to use and **I cannot stress how comfortable the dressing was.** I usually have to ask my daughter to change my dressing, which is embarrassing to ask, but with HydraWear I could do it myself. I would recommend anyone with armpit HS to buy and try this product, it gave me comfort and my dignity back. "

Chris W, USA

"Amazing product. Very comfortable to wear, I always forget that I have it on! **It gives me great freedom, movement, and relief from the pain of adhesive dressings on my skin.** I also find I heal a lot quicker because it's much more breathable than regular dressings."

Laura M, Ireland

“

"The difference was immediate and immense. I found my wound healed faster with having fresh air flow to it, I no longer had rashes, blood blisters and swelling from the adhesive of the dressings I had been using. Nor did I have the added pain of pulling the dressings off already hurting skin."

Anne, UK

"I've been excited since I first became aware of this product. **I actually cried when I received mine in the mail.** Living with stage 3 HS is a constant daily battle and this product lessens some of the madness. It's quick and simple and cuts out some time on wound care. **And NO TAPE under my arms is such a relief!** It's very easy to use and can be hidden under most of my clothing, especially with the removable front strap. All in all I couldn't be happier with this product. Grateful we finally have options in the HS world!"

Britt, USA

" is product is beyond amazing especially for when I'm going out somewhere. Keeps my clothes dry and clean. No more tape and bandages to hide and no more rashes from the adhesive. Love my HydraWear!!! Thank you for this product. It was well thought out to help with my quality of life!"

Jacqueline S, USA

"I noticed the difference in my skin after using HydraWear for only 2 days! It is unbelievable how much more comfortable this HydraWear makes you. My skin was constantly red and sore from dressing adhesive and it was always wet underneath the dressings as they weren't absorbent enough. **After 48 hours the redness and soreness had completely gone,** and my armpits are never left feeling wet anymore as the dressings with the HydraWear are so absorbent. Once you try the HydraWear you'll wonder how you ever lived without it! Thank you to everyone who has helped in designed this."

Hannah S, UK
